

This guide has been organized following the Five Steps of the American Heart Association (AHA) Instruction Cycle. Its purpose is to provide a quick reference to the key steps necessary to conduct courses in the way they are intended. It provides key insight into processes that the Training Center (TC) has identified instructors having misunderstandings with. It is not all inclusive and should be read in conjunction with the Mandatory Reading outlined in the Prepare section. This also serves to ensure one standard is being exercised throughout the TC.
